

Lower San Juan Practice Scores

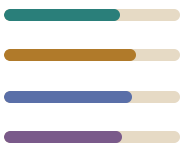

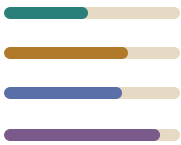

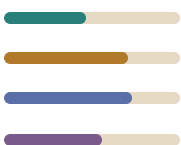

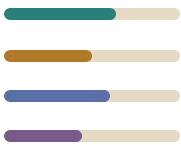

Scores for conservation practices in the Lower San Juan Watershed, adapted from the Kentucky Water Research Institute's Triple Bottom Line method with a fourth dimension, Leveraging, from Utah's BMP Selector. Scores run 0–100; higher is better. Each practice also gets a plain fit rating: Strong fit (65 and up), Good fit (45–64), or Fits some sites (under 45). Practices in a plan priority area get a 5-point bonus.

Draft for review. Most ratings are professional judgment and have not been checked against local data.

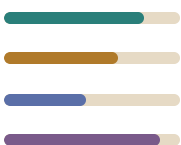

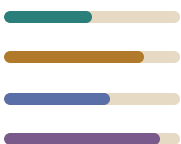

■ Environmental ■ Economic ■ Social ■ Leveraging

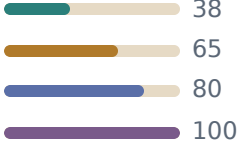

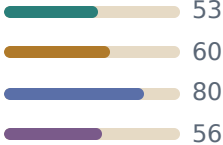

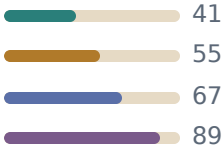

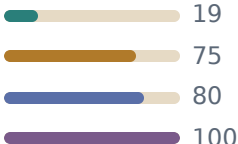

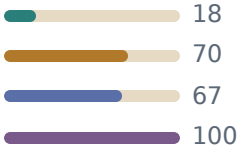

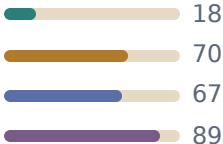

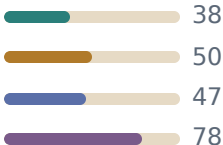

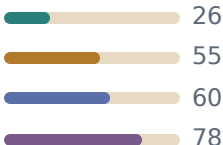

Paired treatments (practices combined on one site)

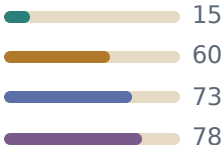

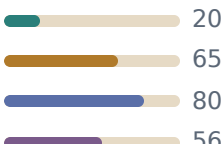

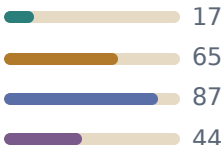

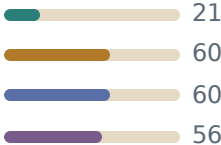

B-1	Riparian corridor package: exclusion fencing, native planting, and one-rock dams		100	100 Overall Strong fit
	per project		65	
	Funding Guide: Riparian restoration		60	
	Plan priority area (+bonus): Lower Montezuma Creek; Bears Ears canyons; San Juan corridor		78	
B-4	Irrigated salinity package: sprinkler or drip, tailwater reuse, and field-edge filter strips		84	100 Overall Strong fit
	per project		65	
	Funding Guide: Drip irrigation; Canal or ditch lining		67	
	Plan priority area (+bonus): McElmo salinity hotspots; lower Montezuma Creek irrigated valleys		89	
B-7	Grazing package: rotational grazing, off-stream water, and riparian fencing		83	99 Overall Strong fit
	per project		70	
	Funding Guide: Cross-fencing or rotational grazing; Livestock watering trough		60	
	Plan priority area (+bonus): Grazed uplands and riparian reaches in Montezuma and Recapture		89	
B-6	Spring package: spring development with protection and wet meadow restoration		83	92 Overall Strong fit
	per project		65	
	Funding Guide: Livestock watering trough; Riparian restoration		67	
	Plan priority area (+bonus): Abajo headwaters and foothill springs; Bears Ears springs		67	

B-3	Gully package: Zuni or Navajo bowl, one-rock dams, brush dams, and seeding Diné and traditional practice per project Funding Guide: Check dams or sediment control Plan priority area (+bonus): Incised gullies in Mancos Shale landscapes (Chinle, McElmo)	 66 75 73 67	86 Overall Strong fit
B-8	Pinyon-juniper package: thinning, slash piles in washes, and seeding Diné and traditional practice per project Funding Guide: Rangeland assessment or plan; Pinyon-juniper management Plan priority area (+bonus): Spring Creek and Montezuma Bench near Monticello; Mancos Shale uplands	 48 70 67 89	77 Overall Strong fit
B-5	Regenerative farm package: soil health, cover crops and contours, and runoff farming Diné and traditional practice per project Funding Guide: Drip irrigation Plan priority area (+bonus): Irrigated and dryland fields in McElmo, Montezuma, and Recapture; Navajo Nation fields	 47 70 73 56	66 Overall Strong fit
B-2	Streambank package: bioengineering, log or rock vanes, and native planting Diné and traditional practice per project Funding Guide: Erosion control or stream stabilization Plan priority area (+bonus): Montezuma Creek reaches with confirmed bank erosion	 64 50 60 44	62 Overall Good fit

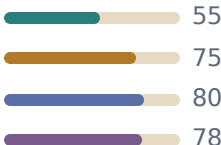

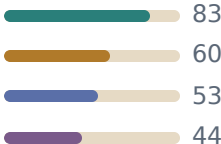

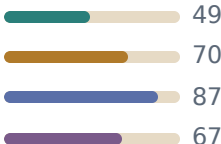

Grazing and rangeland

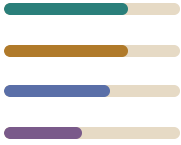

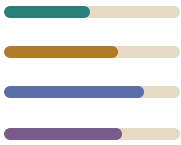

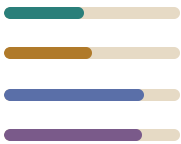

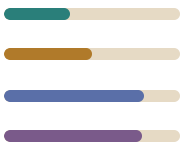

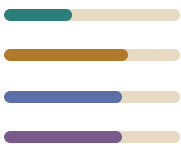

G-2	Livestock exclusion fencing (riparian areas and washes) per 1000 ft Funding Guide: Erosion control or stream stabilization; Riparian restoration Plan priority area (+bonus): Lower Montezuma Creek; Recapture and Montezuma tributaries; Bears Ears and Abajo reaches	 79 65 47 89	90 Overall Strong fit
G-1	Prescribed or rotational grazing with cross-fencing per acre Funding Guide: Cross-fencing or rotational grazing Plan priority area (+bonus): Grazed uplands in Montezuma and Recapture; Mancos Shale landscapes	 50 80 60 89	79 Overall Strong fit

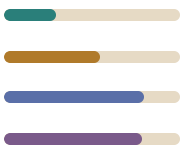

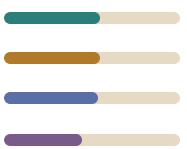

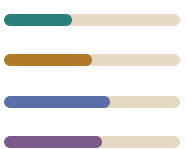

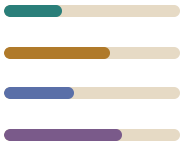

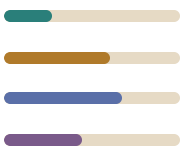

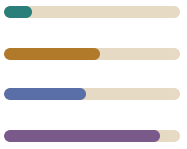

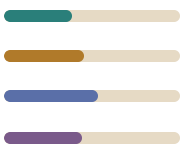

G-3b	Off-stream livestock water: trough and pipeline from existing source per unit Funding Guide: Livestock watering trough Plan priority area (+bonus): Grazing-impacted segments in Montezuma and Recapture; springs	 38 65 80 100	76 Overall Strong fit
G-9	Corral relocation away from washes, with runoff controls (sheep, horse, and cattle corrals) per site Plan priority area (+bonus): Montezuma Creek; Aneth; San Juan corridor	 53 60 80 56	70 Overall Strong fit
G-5	Heavy use area protection (hardened surfaces at corrals and water sites) per site Funding Guide: Livestock watering trough Plan priority area (+bonus): Community-adjacent corrals in lower Montezuma Creek	 41 55 67 89	67 Overall Strong fit
G-8	Range or conservation management plan per acre Funding Guide: Rangeland assessment or plan Plan priority area (+bonus): Grazing allotments in priority areas	 19 75 80 100	66 Overall Strong fit
G-7	Pinyon-juniper and brush management with seeding per acre Funding Guide: Pinyon-juniper management Plan priority area (+bonus): Mancos Shale uplands; Spring Creek and Montezuma Bench near Monticello	 18 70 67 100	59 Overall Good fit
G-6	Range seeding and critical area planting per acre Funding Guide: Rangeland assessment or plan Plan priority area (+bonus): Disturbed uplands in McElmo, Chinle, and lower Montezuma	 18 70 67 89	55 Overall Good fit
G-3a	Off-stream livestock water: solar well and pump per unit Funding Guide: Solar-powered livestock well or pump Plan priority area (+bonus): Grazing-impacted segments in Montezuma and Recapture; springs	 38 50 47 78	51 Overall Good fit
G-12	Earthen stock tanks and charcos: cleanout, spillway repair, and fencing per tank Funding Guide: Livestock watering trough; Check dams or sediment control Plan priority area (+bonus): Grazed uplands on the Navajo Nation, Montezuma, and Recapture	 26 55 60 78	50 Overall Good fit

G-10	Cheatgrass and annual weed treatment with reseeding per acre Funding Guide: Invasive species removal Plan priority area (+bonus): Mesas and Abajo foothills		48 Overall Good fit
G-13	Hillslope contour rock lines, trincheras, and rock mulch Diné and traditional practice per acre Funding Guide: Erosion control or stream stabilization Plan priority area (+bonus): Mancos Shale and sandstone slopes above incised washes		48 Overall Good fit
G-11	Wind erosion control on rangeland: sand fence, brush barriers, and native seeding on dunes and blowouts per acre Funding Guide: Erosion control or stream stabilization Plan priority area (+bonus): Sand sheets and dunes on the Navajo Nation; Aneth and Montezuma Creek uplands		44 Overall Fits some sites
G-4	Hardened or limited livestock crossing per crossing Funding Guide: Erosion control or stream stabilization Plan priority area (+bonus): Grazing-impacted reaches in Montezuma and Recapture		40 Overall Fits some sites

Washes, channels, and riparian areas

C-1	One-rock dams and baffles and media lunas per structure Funding Guide: Check dams or sediment control Plan priority area (+bonus): Incised gullies in Mancos Shale landscapes (Chinle, McElmo)		84 Overall Strong fit
C-10	Wetland restoration in canyon bottoms per acre Funding Guide: Riparian restoration Plan priority area (+bonus): Bears Ears canyons; springs and wetlands		77 Overall Strong fit
C-12	Woven brush dams and brush weirs (juniper, willow, or other local brush) Diné and traditional practice per structure Funding Guide: Check dams or sediment control; Erosion control or stream stabilization Plan priority area (+bonus): Incised washes and fields on Navajo Nation lands; Mancos Shale landscapes		77 Overall Strong fit

C-17	Floodplain reconnection: removing berms and spoil piles and setting back levees per 1000 ft Funding Guide: Riparian restoration Plan priority area (+bonus): Lower Montezuma Creek; San Juan corridor	 70 70 60 44	74 Overall Strong fit
C-16	Waterspreading: low dikes and spreaders that spread wash flow onto rangeland Diné and traditional practice per acre Funding Guide: Check dams or sediment control Plan priority area (+bonus): Valley bottoms below washes in Chinle, McElmo, and Montezuma Creek (Navajo Nation lands)	 49 65 80 67	72 Overall Strong fit
C-7a	Native riparian planting (cottonwood, willow, shrubs) on floodplain terraces with spread-out runoff per 1000 ft Funding Guide: Riparian restoration Plan priority area (+bonus): San Juan riparian corridor; spring-fed canyon streams; private irrigated lands	 45 50 80 78	68 Overall Strong fit
C-7b	Native riparian planting (cottonwood, willow, shrubs) in washes, with concentrated storm flow per 1000 ft Funding Guide: Riparian restoration Plan priority area (+bonus): Lower Montezuma and Recapture Creeks; Bears Ears canyons; San Juan corridor washes	 38 50 80 78	63 Overall Good fit
C-2	Zuni and Navajo bowls and rock rundowns (headcut control) Diné and traditional practice per structure Funding Guide: Check dams or sediment control; Erosion control or stream stabilization Plan priority area (+bonus): Incised gullies in Mancos Shale landscapes (Chinle, McElmo)	 39 70 67 67	62 Overall Good fit
C-13	Log and juniper slash piles in washes and gullies Diné and traditional practice per structure Funding Guide: Check dams or sediment control; Pinyon-juniper management Plan priority area (+bonus): Incised washes below pinyon-juniper treatments; Spring Creek and Montezuma Bench	 30 65 87 67	61 Overall Good fit

C-7c	Native riparian seeding (grasses, sedges, rushes, forbs) on wash margins and floodplains per acre Funding Guide: Riparian restoration Plan priority area (+bonus): San Juan riparian corridor; spring-fed canyon streams	 29 55 80 78	59 Overall Good fit
C-5	Beaver dam analogs and post-assisted log structures per structure Funding Guide: Riparian restoration Plan priority area (+bonus): Bears Ears canyons; Abajo headwater and meadow reaches	 55 55 53 44	56 Overall Good fit
C-11a	Vegetated filter strips at field edges and uplands, with spread-out runoff per acre Funding Guide: Riparian restoration Plan priority area (+bonus): San Juan River recreation reaches (Bluff to Mexican Hat); lower Montezuma Creek	 39 50 60 56	49 Overall Good fit
C-3	Loose-rock check dams and gully plugs over one rock high per structure Funding Guide: Check dams or sediment control Plan priority area (+bonus): Incised gullies in Mancos Shale landscapes (Chinle, McElmo)	 33 60 40 67	45 Overall Good fit
C-14	Log and rock vanes to direct flow away from eroding banks Diné and traditional practice per structure Funding Guide: Erosion control or stream stabilization Plan priority area (+bonus): Montezuma Creek and canyon streams with eroding banks	 27 60 67 44	43 Overall Fits some sites
C-8	Tamarisk and Russian olive removal with revegetation per acre Funding Guide: Invasive species removal Plan priority area (+bonus): San Juan River corridor near Navajo Nation lands and recreation areas	 16 55 47 89	42 Overall Fits some sites
C-6	Streambank stabilization with bioengineering (willow and cottonwood poles, toe wood) per 1000 ft Funding Guide: Erosion control or stream stabilization Plan priority area (+bonus): Montezuma Creek reaches with confirmed bank erosion	 39 45 53 44	41 Overall Fits some sites

C-11b	Vegetated filter strips along washes, with concentrated storm flow per acre Funding Guide: Riparian restoration Plan priority area (+bonus): Washes below fields and corrals in lower Montezuma Creek and McElmo	25 50 60 56	39 Overall Fits some sites
C-15	Wool mat buffers and wool erosion blankets Diné and traditional practice per acre Funding Guide: Erosion control or stream stabilization Where it fits: Disturbed slopes and wash margins; post-fire slopes	22 55 93 33	38 Overall Fits some sites
C-9	Sediment or settling basin per basin Funding Guide: Check dams or sediment control Plan priority area (+bonus): Lower Montezuma Creek; below mineralized ground	22 50 33 44	24 Overall Fits some sites

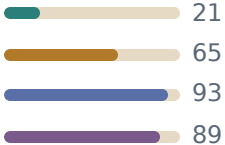

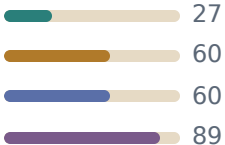

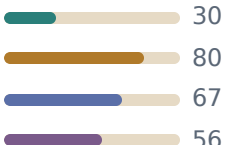

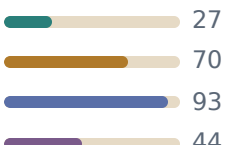

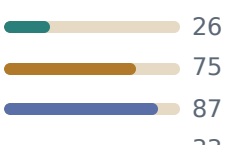

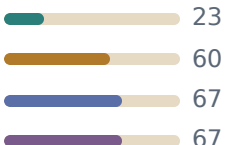

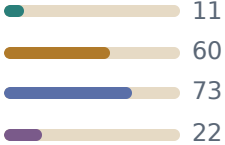

Roads and drainage

D-4	Recreation site sanitation and trail or campsite closure (river corridor, Comb Wash, Cedar Mesa) per site Plan priority area (+bonus): San Juan corridor; Bears Ears canyons	57 45 60 67	64 Overall Good fit
D-2	Road, two-track, and off-road route closure and decommissioning (including routes in washes) per mile Funding Guide: Road or drainage improvement Plan priority area (+bonus): BLM and county roads connected to channels in McElmo, Chinle, and lower Montezuma	25 70 53 67	48 Overall Good fit
D-1	Unpaved road drainage (rolling dips and culverts and low-water crossings) per mile Funding Guide: Road or drainage improvement Plan priority area (+bonus): BLM and county roads connected to channels in McElmo, Chinle, and lower Montezuma	21 50 67 78	47 Overall Good fit
D-3b	Road surfacing with ditch protection per mile Funding Guide: Road or drainage improvement Plan priority area (+bonus): BLM and county roads connected to channels in McElmo, Chinle, and lower Montezuma	18 55 67 78	46 Overall Good fit

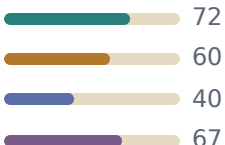

D-3a	Road surfacing: graveled travel way per mile		14
	Funding Guide: Road or drainage improvement		50
	Plan priority area (+bonus): BLM and county roads connected to channels in McElmo, Chinle, and lower Montezuma		67
			78
		42 Overall Fits some sites	
D-5	Oil and gas pad, pipeline corridor, and access road reclamation (orphaned sites) per site		21
	Funding Guide: Erosion control or stream stabilization		60
	Plan priority area (+bonus): Aneth and Montezuma Creek oil fields		67
			56
		42 Overall Fits some sites	

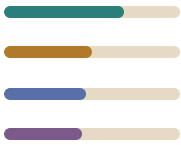

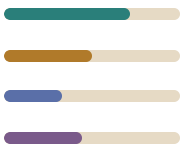

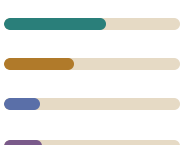

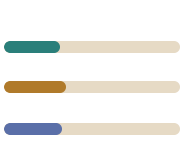

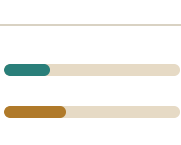

Irrigation, farming, and water efficiency

I-2	Sprinkler or drip irrigation conversion per acre		39
	Funding Guide: Drip irrigation		70
	Plan priority area (+bonus): Lower Montezuma Creek and other selenium-prone irrigated valleys		73
			100
		76 Overall Strong fit	
I-8	Irrigation flow measurement and diversion control structures per diversion		31
	Funding Guide: Canal or ditch lining		75
	Plan priority area (+bonus): Irrigated valleys; McElmo and lower Montezuma Creek		80
			100
		75 Overall Strong fit	
I-3	Irrigation water management and tailwater reuse per acre		39
	Funding Guide: Drip irrigation		75
	Plan priority area (+bonus): Lower Montezuma Creek and other selenium-prone irrigated valleys		73
			89
		74 Overall Strong fit	
I-1a	Canal or ditch piping per 1000 ft		31
	Funding Guide: Canal or ditch lining		75
	Plan priority area (+bonus): Irrigated valleys; McElmo salinity hotspots; Indian Creek to Dry Wash		67
			100
		70 Overall Strong fit	
I-6	Soil health system: reduced tillage, compost, and residue mulch per acre		33
	Funding Guide: Drip irrigation		75
	Plan priority area (+bonus): Irrigated and dryland fields in McElmo, Montezuma, and Recapture valleys		80
			67
		65 Overall Strong fit	
I-9	Diversions and water and sediment control basins on dryland fields per field		30
	Where it fits: Blanding and Monticello dryland farms		65
			73
			89
		60 Overall Good fit	

I-10	Wind erosion control on fields: windbreaks, cross-wind strips, surface roughening, and residue per acre Funding Guide: Erosion control or stream stabilization Where it fits: Dryland fields around Blanding and Monticello; Navajo Nation fields	 21 65 93 89	60 Overall Good fit
I-1b	Canal or ditch lining per 1000 ft Funding Guide: Canal or ditch lining Plan priority area (+bonus): Irrigated valleys; McElmo salinity hotspots; Indian Creek to Dry Wash	 27 60 60 89	56 Overall Good fit
I-12	Retiring irrigation on saline, selenium-rich fields, with conservation cover per acre Funding Guide: Canal or ditch lining Plan priority area (+bonus): McElmo salinity hotspots; lower Montezuma Creek irrigated valleys	 30 80 67 56	56 Overall Good fit
I-11	Biochar, compost, and other organic soil amendments for water holding per acre Funding Guide: Drip irrigation Where it fits: Irrigated and dryland fields; small community farms	 27 70 93 44	51 Overall Good fit
I-7	Runoff (floodwater) farming and water spreading with drought-adapted crops Diné and traditional practice per acre Plan priority area (+bonus): Fields below washes in Chinle, McElmo, and Montezuma Creek (Navajo Nation lands)	 26 75 87 33	50 Overall Good fit
I-4	Cover crops and contour farming on irrigated fields per acre Plan priority area (+bonus): Irrigated field margins in McElmo, Chinle, and lower Montezuma	 23 60 67 67	47 Overall Good fit
I-5	Gypsum soil amendment in selenium-prone irrigated fields per acre Where it fits: Selenium-prone irrigated valleys	 11 60 73 22	21 Overall Fits some sites

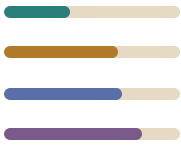

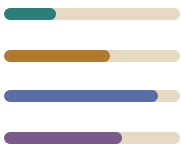

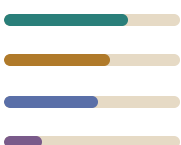

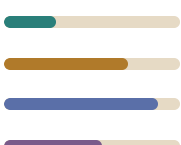

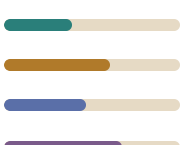

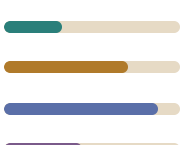

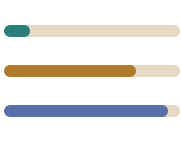

Legacy mine sites (metals and radionuclides)

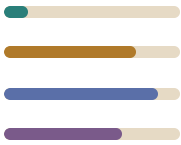

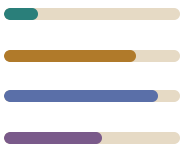

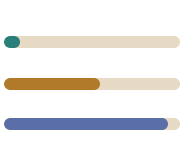

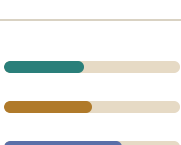

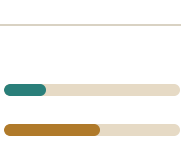

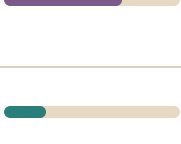

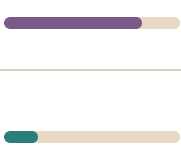

M-3	Removal and consolidation of mine waste to a repository per site Funding Guide: Legacy mine site cleanup (uranium and metals) Plan priority area (+bonus): Abandoned uranium mine clusters (Four Corners)	 72 60 40 67	73 Overall Strong fit
------------	--	--	---

M-1a	Mine waste cover and revegetation: soil cover and seeding per acre Funding Guide: Legacy mine site cleanup (uranium and metals) Plan priority area (+bonus): Abandoned uranium mine clusters (Four Corners); Cottonwood Wash; White Mesa Mill vicinity		68 50 47 44	61 Overall Good fit
M-1b	Mine waste cover and revegetation: engineered cap per acre Funding Guide: Legacy mine site cleanup (uranium and metals) Plan priority area (+bonus): Abandoned uranium mine clusters (Four Corners); Cottonwood Wash; White Mesa Mill vicinity		72 50 33 44	59 Overall Good fit
M-2	Run-on diversion and runoff controls at mine sites per site Funding Guide: Legacy mine site cleanup (uranium and metals) Plan priority area (+bonus): Abandoned uranium mine clusters (Four Corners); Cottonwood Wash		52 50 40 44	47 Overall Good fit
M-4a	Passive selenium treatment: constructed wetland per system Funding Guide: Legacy mine site cleanup (uranium and metals) Plan priority area (+bonus): Selenium-bearing drainages in lower Montezuma Creek		58 40 20 22	33 Overall Fits some sites
M-5	Groundwater interception and treatment for uranium (reactive media or pump and treat) per system Funding Guide: Legacy mine site cleanup (uranium and metals) Where it fits: White Mesa Mill vicinity; confirmed groundwater pathways		32 35 33 11	9 Overall Fits some sites
M-4b	Passive selenium treatment: bioreactor per system Funding Guide: Legacy mine site cleanup (uranium and metals) Plan priority area (+bonus): Selenium-bearing drainages in lower Montezuma Creek		26 35 20 11	5 Overall Fits some sites

Communities and households

H-5a	Stormwater harvesting basins: lot-scale (homes, chapter houses, schools) per acre treated Funding Guide: Town or community stormwater Where it fits: Not a plan priority area; Bluff, Blanding, Monticello, chapter communities		70 65 93 44	79 Overall Strong fit
-------------	---	---	----------------------	---

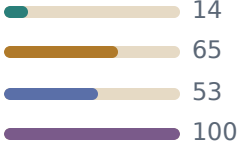

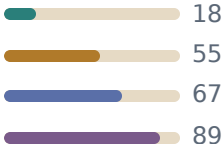

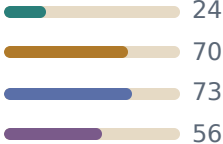

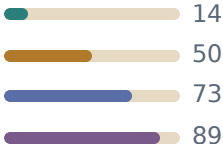

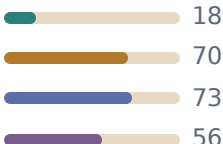

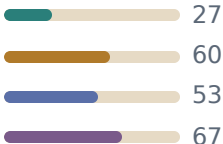

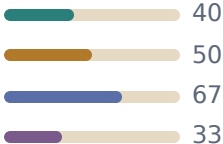

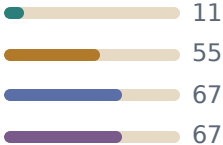

H-1b	Septic system: replacement per system Funding Guide: Septic system replacement Plan priority area (+bonus): Lower Montezuma Creek communities; unsewered areas	 37 65 67 78	63 Overall Good fit
H-1a	Septic system: pumping and repair per system Funding Guide: Septic system replacement Plan priority area (+bonus): Lower Montezuma Creek communities; unsewered areas	 30 60 87 67	59 Overall Good fit
H-9	Backyard livestock pen and manure management near wells and washes per site Funding Guide: Septic system replacement Plan priority area (+bonus): Lower Montezuma Creek communities; homes near washes	 38 65 87 44	59 Overall Good fit
H-5b	Stormwater harvesting basins: street-side with curb cuts per acre treated Funding Guide: Town or community stormwater Where it fits: Not a plan priority area; Bluff, Blanding, Monticello, chapter communities	 70 60 53 22	55 Overall Good fit
H-10	Well and wellhead protection (sealing, setbacks from corrals and septic) per well Funding Guide: Water treatment (arsenic or uranium) Where it fits: Homes and livestock wells; White Mesa and chapter communities	 30 70 87 56	54 Overall Good fit
H-1d	Septic system: connection to a cluster or community system per household Funding Guide: Septic system replacement Plan priority area (+bonus): Lower Montezuma Creek communities; unsewered areas	 39 60 47 67	52 Overall Good fit
H-1e	Outhouse and pit privy replacement (vault or composting toilets) per home Funding Guide: Septic system replacement Where it fits: Homes without indoor plumbing near wells and washes	 33 70 87 44	52 Overall Good fit
H-8	Small community and backyard farms: drip, mulch, and compost per acre Funding Guide: Drip irrigation Where it fits: Chapter communities, Bluff, Blanding, Monticello	 15 75 93 67	52 Overall Good fit

H-7	Rainwater cisterns per unit Funding Guide: Town or community stormwater Where it fits: Not a plan priority area; Bluff, Blanding, Monticello, chapter communities	 14 75 87 67	49 Overall Good fit
H-11	Abandoned well decommissioning (plugging and sealing) per well Funding Guide: Water treatment (arsenic or uranium) Where it fits: Homes and livestock wells; White Mesa and chapter communities	 19 75 87 56	48 Overall Good fit
H-1c	Septic system: advanced treatment per system Funding Guide: Septic system replacement Plan priority area (+bonus): Lower Montezuma Creek communities; unsewered areas	 39 55 60 44	47 Overall Good fit
H-12	Private and livestock well testing (uranium, arsenic, E. coli, nitrate) per well Funding Guide: Water treatment (arsenic or uranium) Where it fits: Homes and livestock wells; White Mesa and chapter communities	 9 55 93 78	45 Overall Good fit
H-6	Vegetated swale with desert plantings per acre treated Funding Guide: Town or community stormwater Where it fits: Not a plan priority area; Bluff, Blanding, Monticello, chapter communities	 46 50 67 33	44 Overall Fits some sites
H-3a	Uranium and arsenic treatment for individual wells (point-of-entry or point-of-use) per well Funding Guide: Water treatment (arsenic or uranium) Where it fits: Not a plan priority area; homes on unregulated wells	 24 55 67 67	41 Overall Fits some sites
H-2	Drinking water line extension per home Funding Guide: Drinking water line extension Where it fits: Not a plan priority area; homes on unregulated wells	 24 60 47 78	40 Overall Fits some sites
H-3c	Uranium and arsenic treatment: community water filling station per station Funding Guide: Water treatment (arsenic or uranium) Where it fits: Not a plan priority area; chapter communities with hauled water	 19 50 67 78	40 Overall Fits some sites

H-4	Wastewater lagoon or treatment plant improvement		36	38 Overall Fits some sites
	per system		45	
	Funding Guide: Wastewater treatment plant		33	
	Where it fits: Not a plan priority area; community lagoons		78	
H-3b	Uranium or arsenic treatment: community system		24	20 Overall Fits some sites
	per system		40	
	Funding Guide: Water treatment (arsenic or uranium)		33	
	Where it fits: Not a plan priority area; homes on unregulated wells		56	

Abajo Mountains forest, headwaters, and springs

F-8	Streamside management zones during forest work (75 ft perennial, 35 ft intermittent)		58	86 Overall Strong fit
	per stream mile		85	
	Funding Guide: Riparian restoration; Fuels reduction or prescribed fire		80	
	Plan priority area (+bonus): Abajo Mountains		67	
F-3	Headwater tributary exclosure (livestock and elk)		76	78 Overall Strong fit
	per 1000 ft		60	
	Funding Guide: Riparian restoration		47	
	Plan priority area (+bonus): Abajo headwater streams		67	
F-11	Spring and seep exclosures (livestock, elk, and feral horses)		53	77 Overall Strong fit
	per spring		65	
	Funding Guide: Riparian restoration		73	
	Plan priority area (+bonus): Abajo headwaters and foothill springs; Bears Ears springs		78	
F-2	Spring and seep and wet meadow restoration		71	75 Overall Strong fit
	per site		65	
	Funding Guide: Riparian restoration		67	
	Plan priority area (+bonus): Abajo headwater meadows; Bears Ears springs		44	
F-1	Spring development with protection and overflow returned		44	68 Overall Strong fit
	per spring		65	
	Funding Guide: Livestock watering trough		67	
	Plan priority area (+bonus): Abajo headwaters and foothill springs; Bears Ears springs		78	
F-4	Forest road drainage and stream crossing upgrades		28	53 Overall Good fit
	per crossing		55	
	Funding Guide: Road or drainage improvement		53	
	Plan priority area (+bonus): Abajo Mountains headwaters (Manti-La Sal NF)		89	

F-5	Fuels reduction thinning and prescribed fire per acre Funding Guide: Fuels reduction or prescribed fire Plan priority area (+bonus): Abajo Mountains headwaters (Manti-La Sal NF)		50 Overall Good fit
F-6a	Post-fire stabilization: mulching and seeding per acre Funding Guide: Erosion control or stream stabilization Plan priority area (+bonus): Burned areas connected to priority waters (Abajo, Bears Ears)		50 Overall Good fit
F-9	Skid trail and landing rehabilitation per acre Funding Guide: Erosion control or stream stabilization; Fuels reduction or prescribed fire Plan priority area (+bonus): Abajo Mountains		50 Overall Good fit
F-6d	Post-fire stabilization: straw wattles, fiber logs, and erosion control blankets per acre Funding Guide: Erosion control or stream stabilization Plan priority area (+bonus): Burned areas connected to priority waters (Abajo, Bears Ears)		48 Overall Good fit
F-6c	Post-fire stabilization: contour raking or ripping with seeding per acre Funding Guide: Erosion control or stream stabilization Plan priority area (+bonus): Burned areas connected to priority waters (Abajo, Bears Ears)		46 Overall Good fit
F-7	Aspen and riparian woody protection from browsing per acre Funding Guide: Aspen protection Plan priority area (+bonus): Abajo Mountains headwaters		46 Overall Good fit
F-10	Induced meandering and wicker weirs in small creeks per stream reach Funding Guide: Erosion control or stream stabilization Plan priority area (+bonus): Abajo Mountains		44 Overall Fits some sites
F-6b	Post-fire stabilization: log erosion barriers per acre Funding Guide: Erosion control or stream stabilization Plan priority area (+bonus): Burned areas connected to priority waters (Abajo, Bears Ears)		37 Overall Fits some sites
